## ONLINE CODDING

You have to complete the function `void update(int *a,int *b)`, which reads two integers as argument, and sets `a` with the sum of them, and `b` with the absolute difference of them.

- 
- 

### Input Format

The input will contain two integers, `a` and `b`, separated by a newline.

### Output Format

You have to print the updated value of `a` and `b`, on two different lines.

Note: Input/output will be automatically handled. You only have to complete the function described in the 'task' section.

### Sample Input

4  
5

### Sample Output

9  
1

### Explanation

### Program:

```
void update(int *a,int *b) {
```

```
int temp = *a;  
*a = *a + *b;  
*b = temp > *b ? (temp - *b) : (*b - temp);  
}
```
